MESSAGE FROM OUR CHAIRMAN & CHIEF EXECUTIVE OFFICER

DNF RESOURCES OIL & GAS NIGERIA LTD is purely an indigenous company, with offices in both Nigeria and United States of America, that emerged as a direct response to the desire for high quality, cost effective and community oriented services.

Our services are segmented into various categories: Supply, Sales, Storage and Delivery of Petroleum Products across the Globe.

DNF RESOURCES OIL & GAS NIGERIA LTD is duly registered and incorporated under the Companies and Allied Matter Act (CAMA) of 1990 under the laws of the Federal Republic of Nigeria with COMPANY REGISTRATION NO. 1798081.

Our embodiment of experienced and versatile staffs distinguish themselves in their various fields.

DR. NICOLAS FELIX

Chairman & Chief Executive Officer (CEO)

We understand that it takes more than a qualified provider to win the customer's confidence, especially when it comes to complex or high-value projects. That is why from the very beginning, our company has been built upon a strong foundation of integrity, honesty, safety, and quality.

We build trust-based, collaborative relationships with our clients and industry partners. This is what sets us apart and what helps us provide continuous customer satisfaction, win repeated business and establish long-term business connections.

We guarantee straight forward business deals at all times.

HERE IS WHAT YOU SHOULD KNOW ABOUT CRUDE OIL

Crude oil is a naturally occurring, unrefined petroleum product which composes of hydrocarbon deposits and other organic materials. It is a type of fossil fuel that can be refined to produce usable products such as gasoline, diesel and various forms of petrochemicals.

It is a nonrenewable resource, which means that it can't be replaced naturally

Crude oil is typically obtained through drilling process, where it is usually found alongside other resources, such as natural gas (which is lighter, and therefore sits above the crude oil) and saline water (which is denser, and sinks below). It is then refined and processed into a variety of forms, such as gasoline, kerosene and asphalt, and sold to consumers.

Although it is often called "black gold," crude oil has ranging viscosity and can vary in color from black and yellow depending on its hydrocarbon composition.

Distillation is the process by which oil is heated and separated in different components, is the the first stage in refining.

We guarantees straight forward business deals at all times.

VARIOUS TYPES OF OIL

WEST TEXAS INTERMEDIATE (WTI)

This type of oil contains low amounts of sulfur and density. Its sulfur content is only 0.24% and its gravity is 39.6 degrees.

The West Texas Intermediate is considered to be both sweet and light crude oil. The refining of this oil is usually done in Gulf regions as well as the United States because it is conveniently situated to oil reserves.

BRENT BLEND

The term Brent Blend is obtained from the geographical location where this type of oil is extracted from. Brent Blend is termed as sweet oil having 0.37% sulfur and 38.06 degrees in gravity. Brent Blend oil is typically used for making petroleum and gasoline for vehicles.

DUBAI CRUDE

As the name puts it, the Dubai Crude oil comes from Dubai – a massive oil producing country in the world. The Dubai crude has a light density, having 31 degrees gravity and a sulfur content of only 2%

We guarantee straight forward business deals at all times.

VARIOUS TYPES OF OIL

RUSSIAN EXPORT BLEND (REBCO)

This type of oil has been the standard for Russian crude oil. This is also a perfect example of sour oil because of its high amount of sulfur. Russian expert blend oil is heavily exported to Italy and Netherlands.

BONNY LIGHT CRUDE OIL Light (BLCO)

Bonny Light oil is a high grade of Nigerian crude oil with high API gravity (low specific gravity), produced in the Niger Delta basin and named after the prolific region around the city of Bonny. DNF Resource Oil & Gas deals mainly on BLCO.

We guarantee straight forward business deals at all times.

ABOUT US

OUR PROMISE TO YOU

“To provide you with real value, outstanding service, and exceptional performance regardless of the size or complexity of your project”

DNF Resources Oil & Gas Nigeria LTD provides clients with in-depth and independent analyses of worldwide crude and petroleum products markets, including fundamentals data, price forecasting, and insights into market developments and emerging trends. Whether you are selling, buying or trading crude or products, our global oil coverage provides commercially oriented analysis of supply/demand fundamentals and price movements. With DNF Resources Oil and Gas successfully closing a deal is extremely high with us, a trier will convince you.

It is obvious the Oil and Gas industry is very complex one however DNF Resources Oil and Gas do everything possible to keep things simple in an otherwise extremely complex trade and yet maintain transparency. Our highly regarded professional team ensures the smoothest experience through each deal either buying from us or selling to us.

Our team works flawlessly to meet timelines set by the traders and engages itself in every aspect of the transaction process to ensure the smooth passage of each deal. A lot of times negotiations are necessitated due to differences in acceptable transaction procedures. Our expert team fully understands such situations and are always available to ensure that all goes well.

We guarantee straight forward business deals at all times.
